☑ Option 1: GenAI Tools Have Been Used

I/We declare that Generative AI tools have been used to prepare the submitted work. The Generative AI tools used and the manner in which they were used are detailed below:

GenAI Tool Used	How It Was Used
Qwen and Gemini	All core ideas, technical solutions, system architecture, and project decisions presented in this assignment were entirely derived from our own personal thoughts and group discussions. We did not use AI to generate the core content. Instead, Qwen and Gemini were used strictly as auxiliary tools for the following purposes: 1. Project Management & Communication: The core decisions for task allocation and risk mitigation were made by the team. AI was used solely to refine the English grammar and professional tone of our internal deadline emails and task allocation checklists to ensure clear communication.
	2. Academic Writing & Structure: The 9-section structure and all cited sources were determined by our group discussions. AI was used strictly to check APA 7th formatting compliance and to polish the academic tone and grammar of our original drafts, ensuring our ideas were expressed clearly.
	3. Content Integration: The technical deliverables (ZAP results, Red Team logs, code snippets) and their mapping to specific Proposal sections (e.g., Section 2, Section 5) were decided by the team. AI was used only to help articulate these technical details coherently in formal English, ensuring the text met the module's academic standards.

	In summary, the AI acted solely as a proofreading, formatting, and language-refinement assistant to enhance the clarity of our original work, without generating any of the fundamental project concepts or technical implementations.

☐ **Option 2: GenAI Tools Have Not Been Used**

Declaration Statement:
I declare that I have critically reviewed, edited, and verified all AI-assisted content. The final submitted work represents my own understanding and the collective effort of Group 7. I take full responsibility for the accuracy, originality, and academic integrity of this submission.
